

tamassociati

architecture and social design
since 1995

tamassociati,

architecture and social design since 1995

////// tam > works to uphold a culture of civil rights
tam > participates in and for responsible development
tam > imagines feasible utopias

tamassociati is a professional practice active in the fields of sustainable architecture, urban planning, landscape design, participatory processes, graphic design and social communications.

tamassociati actively upholds the principles of ethical and responsible project planning. Through our work, we aim to carry out actions that favor human civil rights and sustainable development. We work for public institutions, NGO's, non-profit organizations and private commitments.

On each project we promote sustainable technologies, participatory planning and use local building techniques, labour and materials. We emphasise training local participants to build capacity and increase technical skill wherever possible.

Some of the current and completed projects include: Banca Etica Headquarter, Padua (I); healthcare buildings for Emergency NGO in Sudan, Sierra Leone, Uganda, Central African Republic and Nicaragua; urban spaces and landscape projects (Piazza Marconi, S. Giorgio Piacentino; Piazza Guala, La Spezia; Pellestrina Island landscape plan; S. Giacomo Urban Park, Anzola dell'Emilia); social campaigns (workplace healthcare campaign for ANMIL; design for all project for Tecnothon-Telethon Foundation).

tamassociati has won many important competitions and has also been awarded numerous national and international prizes (The Architecture Review Awards for Emerging Architecture 2007; ArchitekturXport Detail Prize 2009; Dedalo Minosse Award 2008). Projects of **tam**associati are published in the main international architectural reviews and have been shown in many different exhibitions.
